PENSIONERS MUST BE PROPERLY IDENTIFIED

Says Treasury Department.

The exhibition of a pension certificate is not an identification of the person named therein, according to a ruling of the Treasury Department. The ring has been made in the case of a Geo

of the Treasury Department. The ruing has been made in the case of a Georgia woman, Clarissa Owen, whose real name was Molly Melton. She obtained pay at the rate of \$3 per month from April \$8, 1901, to May 4, 1903, by representing herself as the wife of a dead soldier.

The department hoigs that in this case, in which pension agent's checks have been drawn payable to her order and delivered to her on vouchers executed by her, the banks having cashed the checks and the subtreasury having paid them, the Government will make reclamation of the amount. Bankers and other persons who cash pension checks are thus held responsible for establishing the identity of the payees.

In the examination of this claim, it developed that the soldier left a widow who is supposed to have died in Florida. Molly Melton, a sister of the deadd soldier, through forged indorsements of her dead sister-in-law, obtained the will consent to run, and Cambria county will rename Mr. Evans. At the proper time Blair and Evans, it is said, will define the United States prison at Atlanta, Ga.

THINKS LAND FRAUDS HAVE CEASED IN WEST

of Entries Under Timber and Stone Act to Be Removed.

That the Interior Department feels is has effectively put an end to the land frauds in the West was shown yesterday when the suspension of entries under the timber and stone act was removed. All entries under the act were suspended more than a year ago, and clerk, competent, to perform typewrit-ing and stenographic work, at the rate for lands within its provisions. It was entries had been made under the act, and a cursory examination showed that there was a large element of truth in the charges. Inspectors were sent to the scene and have worked without ceasing ever since.

Now that the suspension has been raised the work of granting the patents will proceed, but each entry will be carefully scrutinized, and those which bear the slightest suspicion of fraud will be held back until the doubts have een cleared away.

The Interior Department indicated yesterday that there would be no more arrests of importance in the land fraud ases until after the preliminary hearing on December 20, of John A. Benson of San Francisco, who was arrested in Washington on Friday on the charge of bribing Woodford D. Harlan of the Gen-eral Land Office to give him advance information about proposed forest re-serves. It is known that the depart ment suspects a number of persons of States Commissioner Taylor considers the evidence sufficient to hold him for the grand jury then other arrests are expected to follow at once or in a few

Inspector Greene, at Portland, Ore. notified the department yesterday that Albert Harrington, of Falls City, Ore., had been held under \$1,000 bond on the charge of impersonating assistants to Special Agents Patterson and Hobbs.

ALL APPOINTMENTS MADE WERE 40,243 LAST YEAR

This Was 36 Per Cent of the Number Seeking Examinations Under Civil Service Commission.

Of the persons examined last year by the Civil Service Commission nearly 20 per cent passed, and 36 per cent of those examined obtained positions. The num-ber of persons examined for the classifled service was 112,624, and there were 40,243 appointments to all branches of the Government service. These are the figures given in the annual report of Frank M. Kiggins, chief examiner of the Civil Service Commission, which was made public yesterday.

Of the appointments 24 per cent were to purely cierical positions, 3 per cent to professional, technical, or scientific positions, 28 per cent to mechanical positions requiring no educational examination, and 7 per cent to skilled labor positions not exactly mechanical in their character, but requiring no educational examination. Mr. Kiggins says the Commission has reduced its examinations to essential tests of fitness, and urges the consolidation of a large number of local boards of examiners throughout the country to secure closer supervision and more effective admin-

In those examinations given in both English and Spanish in which Americans and Porto Ricans competed it appears that a larger proportion of Porto Ricans passed than of Americans, and the showing made by the natives of the island in those examinations was extremely creditable.
